Online Food Delivery Analysis: Data-Driven Business Insights

Customer & Order Analysis

1.Identify top-spending customers

The top customers mostly have the most orders, not the biggest ones, and spending is spread widely (the top 10 customers make up only 0.3% of revenue.

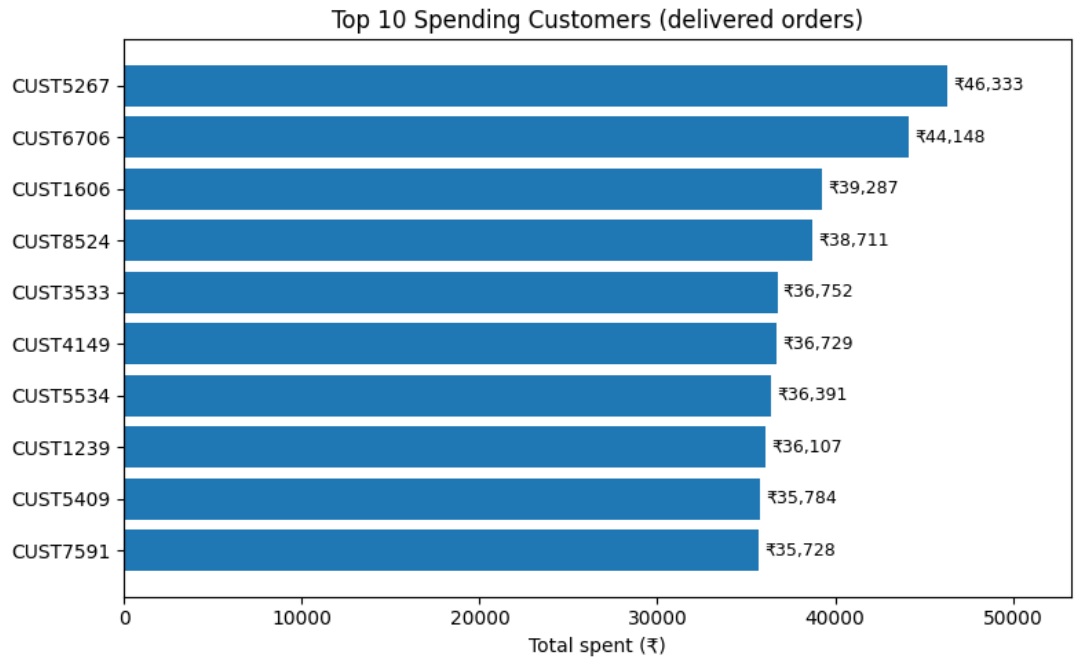

Illustrative sample records:

Customer ID	Total orders	Total spent	Avg order_value	Last order
CUST5267	19	46333	2438.58	2024-12-26T00:00:00
CUST6706	18	44148	2452.67	2024-12-17T00:00:00
CUST1606	18	39287	2182.61	2024-11-16T00:00:00
CUST8524	14	38711	2765.07	2024-10-31T00:00:00
CUST3533	19	36752	1934.32	2024-10-31T00:00:00
CUST4149	16	36729	2295.56	2024-11-17T00:00:00
CUST5534	18	36391	2021.72	2024-12-17T00:00:00
CUST1239	18	36107	2005.94	2024-12-15T00:00:00
CUST5409	13	35784	2752.62	2024-12-29T00:00:00
CUST7591	15	35728	2381.87	2024-11-04T00:00:00

Visualization – 3

Below chart shows customer total spend before and after capping.

3.ANALYTICAL INSIGHTS – DEMAND AND REVENUE

Insight - 1: Top spenders create demand by ordering often.

Top spenders place about minimum order in a year, against everyone else, and their orders are a bit bigger (₹2,134 against ₹1,654). Frequency matters most. The best way to grow revenue is therefore to encourage more repeat orders from all customers, not to target a fixed group of "top spenders".

Insight – 2: Fewer cancellations mean more revenue.

Only 10% of top spenders' orders are cancelled, against other customers. Every cancelled order is lost revenue, and part of the gap is automatic, since cancelled orders don't count as spending. Even so, reducing cancellations is a direct way to lift each customer's spending.

Insight – 3: No big spenders.

The top 10% of customers bring in only 18% of the money. Revenue comes from many customers in roughly equal amounts, not from a few.

4.ANALYTICAL INSIGHTS-OPERATIONS AND CUSTOMER EXPERIENCE:

INSIGHT – 4 : Customer Retention and Repeat Orders

For top spending customer analyse repeat purchase rates, order frequency, and time between consecutive orders. Increase loyalty and prevent customer churn. So that customer repeat orders.

INSIGHT – 5: Complaint Resolution Efficiency

Improve customer support and customer satisfaction by measuring complaint frequency, first-response time, resolution time.

INSIGHT – 6: Personalized Offers and Recommendations

Analyse purchase history, favourite restaurants, preferred products, and responses to promotions.
