Online Food Delivery Analysis: Data-Driven Business Insights

Customer & Order Analysis.

6. High-revenue cities and cuisines:

All five cities and all five cuisines earn almost the same revenue**.** The top city beats the lowest by only 2%. The top cuisine beats the lowest by only 2%. Differences in average order value are even smaller. Revenue is spread evenly across cities and cuisines .so no city or cuisine is a significant revenue driver.

Illustrative sample records :

revenue	orders	Avg order
18.98	14096	1346.61
18.81	14061	1337.62
18.67	14179	1316.54
18.48	14029	1317.20
18.43	13854	1330.55
18.41	13881	1326.50

Cuisine Type	revenue	orders	Avg order
Unknown	19.04	14191	1342.04
Chinese	18.85	14032	1343.32
Mexican	18.77	13926	1347.66
Indian	18.70	13990	1336.38

3.ANALYTICAL INSIGHTS – DEMAND AND REVENUE

INSIGHT – 1: City revenue is almost equal.

Bangalore is the top city and Mumbai the lowest, with Hyderabad, Delhi and Chennai in between. The gap between best and worst is about 2% of an average city's revenue, and the difference isn't statistically significant.

INSIGHT – 2: Demand is equal, so revenue is equal.

Delivered orders range only from 13 %to 14% across cities and from 13,922 to 14,039 across cuisines. Revenue differences come straight from tiny differences in order counts.

INSIGHT – 3: Cancellations take the same share everywhere.

Cancellation rates are 14.9% to 15.2% across cities and 14.8% to 15.4% across cuisines. Lost sales run about ₹4.1M to ₹4.3M in each city and ₹4.1M to ₹4.4M for each cuisine around 15% of potential revenue everywhere.

4.ANALYTICAL INSIGHTS-OPERATIONS AND CUSTOMER EXPERIENCE:

INSIGHT – 4: Prioritize top Revenue-Generating Cities

Rank cities by total revenue and average order value and prioritize marketing investments and delivery capacity in cities with strong revenue potential.

INSIGHT – 5: Analyse most Profitable Cuisines by City

Promote cuisines that generate strong contribution profit rather than focusing on revenue alone.

INSIGHT – 6: Revenue Growth Opportunities in Emerging Cities

Expand restaurant partnerships and targeted marketing in cities with promising demand and sustainable unit economics.
